

WHAT IS CLAIMED IS:

1. A system for producing and sending a loan document to a customer, the system comprising:

a web-enabled customer interface which receives loan information from the customer;

5 a network coupled to the customer interface, the network receives the loan information from the customer interface;

a web site coupled to the network, the web site receives the loan information and merges the loan information with a loan application form to produce a loan application;

10 a loan processor, coupled to the web site, the loan processor receives the loan application, performs a credit check on the customer based on the loan application, and determines whether the customer should receive a loan based on the credit check; and a document server coupled to the loan processor, the document server generates and sends the loan document to the customer, based  
15 on the loan application, when the loan processor determines that the customer should receive the loan, the loan processor sends the loan document to the customer through one of e-mail, facsimile, the network, a first printer coupled to the network, and a second printer coupled to another network

2. The system as recited in claim 1, further comprising:

a credit approval agency coupled to the loan processor; wherein the loan processor performs the credit check by sending the loan application to the credit approval agency.

3. The system as recited in claim 1, wherein:  
the network is the Internet; and  
the customer interface is one of a computer, a personal digital assistant,  
and a loan application kiosk..

4. The system as recited in claim 1, wherein the loan document  
includes at least one of a check and data relating to an electronic transfer of  
funds relating to the loan.

5. The system as recited in claim 1, wherein the loan document  
includes insurance information relating to the loan.

6. A method for producing and sending a loan document to a  
customer, the loan document detailing terms of a loan, the method comprising:  
receiving loan information from the customer over a network by a  
website;

5 merging the loan information with a loan application form to produce a  
loan application;

performing a credit check on the customer based upon the loan  
application;

10 determining whether the customer should receive the loan based on the  
credit check; and

when the processing determines that the customer should receive the  
loan, sending the customer a loan document associated with the loan, the  
sending being through one of e-mail, facsimile, the network, a first printer  
coupled to the network, and a second printed coupled to another network.

7. A method for creating a loan contract between a customer and a bank, the loan contract including terms where the bank loans money to the customer, and terms where the customer is obligated to pay the money back to the bank, the method comprising:

5 the bank performing the steps of:

receiving loan information from the customer, the loan  
information indicating the terms;

processing the loan information to determine whether the  
bank desires to enter into the loan contract; and

10 if the bank desires to enter into the loan contract:

sending a loan document to the customer, the loan  
document being associated with the loan contract and  
listing the terms; and

15 sending a check to the customer, the check  
corresponding to the loan contract;

thereafter, the customer performing the steps of:

receiving the loan document;

receiving the check; and

negotiating the check;

20 whereby the cashing the check indicates acceptance by the customer of the  
terms listed in the loan document.

8. The method as recited in claim 7, wherein:

the receiving the loan information includes merging the loan  
information with a loan form to produce a loan application; and

5           the processing the loan information comprises sending the loan  
          application to a credit approval agency.

9.       The method as recited in claim 7, wherein the receiving loan  
information includes receiving the loan information over a network.

10.      The method as recited in claim 9, wherein:  
          the network is the Internet; and  
          the receiving loan information includes receiving loan information from  
the customer through one of a computer, a personal digital assistant, and a loan  
5   application kiosk.

11.      The method as recited in claim 9, wherein the sending the loan  
document includes sending the loan document to the customer through one of  
e-mail, facsimile, the network, a first printer coupled to the network, another  
network, and a second printer coupled to the another network.

12.      The method as recited in claim 7, wherein the sending the loan  
document includes sending the loan document to the customer through one of  
e-mail, facsimile, a network, and a printer coupled to the network.

13.      The method as recited in claim 7, wherein the bank further  
performs the step of analyzing the check to determine whether the check is  
valid.
